

# Automotive Industry Analytics Dashboard

## Info

Learn how to navigate and use this dashboard.

## Sales Overview

Analyze sales performance using key metrics, monthly trends, models, and profitability insights.

## Weather Impact

Analyze how weather conditions affect vehicle sales and customer demand.

## Car Dealers

Compare dealer performance, sales volume, locations, and average days to sell.

## Car Recalls

Explore vehicle recalls, affected units, system issues, and recall trends.

## Support

Get help, report issues, or contact support for assistance.

## Dashboard Information

### About This Dashboard

This interactive dashboard provides insights into automotive sales, dealer performance, weather impact, and vehicle recalls. Use the navigation buttons and filters to explore the data and identify key trends and performance indicators.

### Dashboard Sections

#### Sales Overview

Analyze vehicle sales, monthly trends, model performance, and key sales metrics.

#### Weather Impact

Explore how weather conditions influence vehicle sales and overall demand.

#### Car Dealers

Compare dealer performance, sales volume, locations, and average days to sell.

#### Car Recalls

Analyze recall units, affected vehicle systems, models, and monthly recall trends.

## How to Use

### 1. Select Filters

Use City, Dealer, and Model filters to narrow the analysis.

### 2. Explore Visuals

Click charts and data points to cross-filter other visuals.

### 3. View Details

Hover over charts to see additional information and values.

### 4. Reset Analysis

Clear the selected filters to return to the overall view.

### 5. Navigate

Use the navigation buttons to move between dashboard pages.

## Data & Purpose

### Purpose:

This dashboard is designed for interactive analysis of automotive industry data, helping users identify sales trends, dealer performance, weather relationships, and recall patterns.

### Data Usage:

The dashboard is intended for analytical and educational purposes.

### Monthly Recall Trend

Sum of Units by Month

### Recall Performance Insights

At 158805, April had the highest Sum of Units and was 429.01% higher than November, which had the lowest Sum of Units at 30019.

April accounted for 15.94% of Sum of Units.

Across all 12 Month, Sum of Units ranged from 30019 to 158805.

Recall data reflects historical records and is not tied to the current sales/dealer time period shown elsewhere in this dashboard.

## SUPPORT & HELP CENTER

NEED HELP?

Use the information below to troubleshoot common issues and get the most out of this dashboard.

### COMMON ISSUES

#### Filters not showing expected results

Clear all filters and selections, then apply the required filters again.

#### Visuals are not displaying correctly

Reset the filters and refresh the report if the issue persists.

#### Numbers appear different across visuals

Check the active filters and slicer selections before comparing values.

#### Unable to navigate between pages

Use the navigation buttons to move between dashboard sections.

#### Need more details from a visual

Hover over charts and data points to view additional information.

### DASHBOARD TIPS

- Use slicers to narrow your analysis.
- Click chart elements to cross-filter other visuals.
- Hover over data points to view detailed values.
- Clear filters to return to the overall view.
- Use the navigation menu to move between pages.

### FEEDBACK & ISSUES

#### Found an issue or have a suggestion?

Please note the page, visual, and issue encountered so it can be reviewed and resolved.
